What's New In AIColorPicker?

AIColorPicker is a very easy-to-use color picking utility that may pick color from your computer screen and copy the picked color code to clipboard. If you're starting a design project, AIColorPicker is an absolute gem. This color picker gets you up close with a built-in magnifier, grabbing palettes of up to

16 colors at once. Control it from the keyboard and grab up to 16 colors at once. See your color in RGB and HSL and get websafe info.

Consistently the most popular free color picker on the web, this version offers more choices to easily and effectively create color palettes. It can show Hue, Saturation and Brightness values. This small free tool does not cost you much resources, it is very small and faster. It will be very useful to webpages designers or graphic users. You may get any point's color value easily as you

want. Adds drop down menus to lists, checkboxes, radio buttons, text input fields, and selects. A full list of many different types of lists is included. A full list of many different types of controls is included. This is a special version of the list control plugin. With this version of the plugin, you can add drop down menus to lists, checkboxes, radio buttons, text input fields, and selects. ...- if you set the drop down list width it is a user controlled dropdown list not a live or immediate drop down list.

2.2 a more complete

version. Includes more types of lists like combo boxes, checkboxes etc. You can also add a custom dropdown list to a list. It works with any list control in any CSS file. If you want to include a dropdown list (with comboboxes, radio buttons or whatever) just put this javascript on top of your CSS. CSS:

```
input[type="text"],
input[type="password"] {
background: #c7c7c7;
padding: 5px; border: none;
width: 225px; margin: auto;
} input[type="text"]:focus, i
nput[type="password"]:focu
s { background: #fff;
```

```
border: 2px solid #000; }
```

HTML: Apple Banana In

this sample I set a

dropdown list with a list and

a combo box. I use the CSS

for the list and then the CSS

of the combo box for the

dropdown. Just change the

id="opt1" to the id of the

control you want to show

the dropdown list on. To

make
