ASUS CD-ROM Speed Setting Utility Crack

A utility that allows you to set the drive speed of optical drives. Includes support for the following interfaces: ASUS CD-ROM Speed Setting Utility (USB) allows you to control the drive speed of optical drives. This utility allows you to configure the drive to set itself at the desired speed. For example, the utility supports setting the drive speed at 4X (real time, such as the factory speed), which allows you to change the speed while you use the optical drive. This utility is USB-1.1 compliant, so you do not need to use the USB-2.0 adaptor in the utility to use it on your computer. This software does not support SCSI Interface, please do not use it in conjunction with other SCSI hardware. From the Splash screen, you can: -Select a disk drive to set-the drive speed. -Set the speed with the numerical value from 0 to 99. -There are several different speed levels available on your computer, and if you make changes to the drive speed settings, then the speed of the optical drive will change accordingly. -The fast-speed levels are: 4X, 8X, 9X, 16X, and 24X. -The slow-speed levels are: 2X, 3X, 6X, and 9X. -There is also a default speed of 4X, which will not change the speed of the optical drive. -When the default speed of 4X is selected, then the drive speed can be set from 0 to 99. -Selecting the Load Defaults option on the splash screen will load the default settings in the software, which is the same as selecting the default speed. -Selecting the Options... menu item will open the Options dialog box. -In this box, you can: -Enable or disable check updates. -Select what format the software should use. -Adjust the window size. -Change the window title. -Choose the color of the background. -Select the color of the text. -Change the font size. -Enter your name for your name and email address. -Select the checkbox for the Set as default button. -Select the checkbox for the Show hidden files. -Select the checkbox for the Search through
