BinHex CryPactor is a powerful application that is capable of easily making your files look just as you want them to. Why is it better than its competitors? ✓ It's fast ✓ It's portable. ✓ You can easily create new rules and apply them to files Yep, and I´ve never tried a program that does what BinHex does in a simpler way (that doesn´t even need HexView!). Best of luck with your project. ...so I bought it, installed it and also tested it. It´s such a wonderful, simple and handy tool that it´s well worth the money. It´s like a hand in hand, your hand doing the coding and my hand getting the perfect output. Ok, if I´m in a rush for instance and I´ve to convert 3 million lines of code in a short time, then I´ll have to use a version or a plugin for Microsoft Word or Google Docs to preview the project and then do the conversion in BinHex. If I´m not in a hurry and there´s not many files to be processed, then I´ll just keep using it. Thank you very much.
