This is a software for you to optimize data placement on the disk to fit in the greatest possible way the space on the disk. If the disk is CD- or DVD-type, it's quite easy for you to use Discollate. After you insert the disk into the computer, Discollate starts, and you need to insert only one folder on the disk. You need to do it in this way: insert the disk into the drive of your PC, and when Windows Explorer starts, drag the folder onto the Discollate window. You can see this folder in the windows Explorer in the left part of the window Discollate. When you click "OK", the software will calculate the most appropriate place of the folder on the disk and will display it in the window. When you open the folder, there will be displayed the same data, which you have on the folder, on the disk. You can do the same with separate files. With your help Discollate becomes a good assistant for you. Version: 0.5.4 Discollate Format Notes: Discollate does not write any information on disks, it doesn't have any author's name. It works with the help of LZX compression algorithm. With that algorithm you can compress the data on the disk by five times, save disk space and time of data transfer. Program features: 1. The program can work with the following types of carriers (CD-ROMs, etc.): • CD-ROMs (both standard and multimedia) • DVD-ROMs • VCD-ROMs • SVCD-ROMs • CDI-ROMs • DVDI-ROMs • DVD-RAMs • SD-RAMs • HDD-ROMs • DVDs (not DVD-ROMs). 2. Several disk formats: • ISO-9660. It's a standard file format for CD-ROM, DVD-ROM, etc. • UDF. It's a file format for CD-ROMs and DVD-ROMs. • LZX. It's a file format for CD-ROMs and DVD-ROMs. 3. User-friendly interface: • Drag and drop, so you can just drag a folder on the program window. • The program window is closed when the program is not in use. • As you drag the folder on the window, it opens. • The program window shows on the screen the size of the folder, the capacity of the disk in which you place the folder, and the size of the folder on the disk. • Folder size is shown in Kilo (K), Megabyte (M), Giga (G), etc. • Capacity of the disk is

shown in TB (Terabyte), etc. • A date is shown on which the program worked with the folder. 4
