You can also enjoy your downloaded DivX files on your favorite site, download video files from YouTube and convert them to DivX with just a few clicks. Fantastic player. A recent update to the version 1.9.2 now allows me to play AVCHD (via movie@) HD DVD discs, even in regions other than US. The player works on MacOS X. Excellent product. I have used this product on OSX and Windows XP. The player is fantastic and allows me to convert files to divx format, without any problems. Once converted, I can playback the file in both QuickTime and Windows Media player on my MAC. Great. No more playing MP4 format video to my player through VLC. I can play MKV (DivX 5) and AVCHD directly from my USB storage device. No need for a 3rd party tool.
