HD File Auto Search is a lightweight tool that makes it easy to catalog all your favorite digital media. The app works by reading the files from the source directory, one by one, then using the file information to catalog all the files it finds in a customizable way. You can set the app to search by various file properties, such as title, type, rating, actors, directors, etc. You can even compare your collection against that of a friend and see what they are missing or what you may be missing. You can also search for duplicates and organize the collection as you wish. You can use the data to upload it to your Google Drive, where it can be used to organize and manage your files on Google Drive (i.e. as a catalog).
