He should not install anything else, should not. How many hours ago did the software update to version 2.5.36 end? Not 5, but 5, not 5.5, but more than five hours. Apparently, the updates are broken into 30-day packages - these vassals are paranoid. \\software\microsoft\win.exe Why can't I find this log? Because he is not there, because he is not there. Why is it not located? Because he is hidden. Okay, we work in a group and complete packages, there is absolutely nothing to do with them, except to look at the data on the dir key, find it and edit it. How to do it? Very simple. Smart people have long begun to write scripts to bypass the unmounting of group policies. Typically, the unmount config is only deleted when you exit Group Policy. And about windows upgrade policy, it would be necessary to read the documentation. Oops, sorry, I was away again for 5 seconds. Windows has already tested - good, very good.
