Jul 21, 2019 This error pops up after I play Max Payne 3 normally. I had the same issue, but eventually I came across an answer for it. Check out this video: Max Payne 3 won't launch. D3d compiler error. What's up everyone? I'm trying to get Max Payne 3 to run on an ancient Windows 3.1 MBP that I bought from someone years ago and am running v1.07 OS. It's an older game (PC), so perhaps that's the issue? Try reinstalling the program via the discs that were supposed to come with it. If you're using Steam, it should have come with them or you should have been able to purchase them by clicking the link "CD Keys" listed under the D3D Compiler. Windows

3.1—or there is a problem with your Windows 3.1 (Win 3.11) installation. This occurred to me when I was trying to load up Fallout 3 when it was suddenly installed, and I was given the blue screen and the error code of 3dddcompiler.dll DLL error as I know it. But this is not exactly why my Win 7 system won't play both games even when there is no error message... I've also tried the latest version of the D3D Compiler and it still won't play.
