animation FX plugins *
Create screensaver *
Share your photos A: I
was able to easily
integrate PhotoRap into
a flex project as a web
service. /** * @author
BigDumper * Created by

```
BigDumper on 3/8/14. *
*/ public class
PhotoRapService
extends Service {
@Override public void
onCreate() {
super.onCreate(); }
@Override public void
onDestroy() {
super.onDestroy(); }
@Override public
IBinder onBind(Intent
intent) { return null; }
public void performPhot
oRap(Context context,
File photo) { Intent
```

```
photoRapIntent = new
Intent(context,
PhotoRapActivity.class);
photoRapIntent.putExtra
("photo", photo); context
.startActivity(photoRapI
ntent); } }
```

And then, in my main activity, I would just do something like `@Override`

```
protected void
onCreate(Bundle
savedInstanceState) { su
per.onCreate(savedInsta
nceState); setContentView
w(R.layout.activity_mai
```

```
n); try { photoRapService.performPhotoRap(this, photoPath); } catch (IOException e) { e.printStackTrace(); } }
```

FILE - A young victim is taken by emergency personnel for treatment after a shooting

PhotoRap With License Code

This animation program is really simple and easy to use. Just enter the name, duration and the

path to your photo files,
select one of the 17 built-
in animation effects and
choose a color for each
of your pictures...
