A superb professional multi-channel macro recorder software, let you record any keystroke, mouse and screen shots of your computer. It is the most powerful macro recorder you can have. It records every detail of your keyboard or mouse movements. KEYMACRO captures: - Any keystroke, mouse click and mouse movements (even if you move the mouse in a hidden window); - Screen shots of whatever you select; - Password and access keystrokes for database applications (including MySQL, SQL Server, Oracle); - Browser bookmarks (including IE, Chrome, Firefox, Safari and many more); - Any search or browser text box. KEYMACRO gives you unlimited storage capacity for all recorded files. You can also export all data to a Zip archive (a special format for computer archives) or send them as Email attachments. There is a built-in editor for the recorded files, so you can edit the data, and/or sort, cut and paste the records to any desired files. There is an option to add additional sound files to the recorded tracks (such as the Windows startup sound, or the Windows task manager sound, or any other sounds you might like). You may also export and/or compress the data to help you to protect your data. If you lost your data or wanted to backup your data, you can use KEYMACRO to create a Zip file (a special format for computer archives) that can be used as a data backup. In that way, you will not need to store the data on a floppy disk or CD. KEYMACRO will keep your data safe and secure. Key features: - unlimited storage capacity - export to Zip archive (zip files can be used for data backups) - import from ZIP archive - password protect your archive - record mouse clicks - record screen shots - record keystrokes and mouse movements (even if you move the mouse in a hidden window) - edit and export the recorded data - email the data - sort, cut and paste the data - record audio (with the built-in sound editor) - password protect the data - record sound files - export and compress the data - record the Windows startup sound - record the Windows task manager sound - record any sounds you like - record images - import data from Zip archive - password protect the data - record Internet Explorer bookmarks - record browser history - record any text box (useful if you
