TinyReminder (formerly Remainder) Crack Serial Number Full Torrent Download [Mac/Win] (Updated 2022)

TinyReminder (formerly Remainder) Free Download For PC 2022

TinyReminder is a simple, straightforward and lightweight software solution that allows you to create reminders to be displayed on your desktop. No installation necessary It is important to mention that this program does not require to be installed, thus it does not create registry entries in your system and you can just run the executable file from any drive, either fixed or portable. Colorful notifications The application sports a clean and intuitive interface that allows you to set up the notifications as you like. TinyReminder enables you to specify the title of the reminder window and customize the message that should be displayed on the pop-up notification. Furthermore, this tool provides you with the possibility to choose the colors of the displayed message to be randomly changed each time. You can also specify the time interval of the reminder notification and select from seconds, minutes or hours, as well as choose to be reminded only once. The notification window of TinyReminder displays the text message you specified, the number of the reminder and the time until the next reminder is displayed. Additionally, with each notification window there is an acoustic alarm played, so you can know that the message is displayed even if you are away from the computer. This utility also offers you the possibility to explore various information about your computer, such as the Java versions installed, operating system and the default language. Conclusion To sum things up, TinyReminder, with its sleek and clear-cut interface, proves to be a reliable software tool for those who want to stay up to date with appointments or track their to-do lists. TinyReminder (formerly Remainder) Cracked Version Installation: - Double click on the TinyReminder-32bit.exe file to start the installer - Go through the installation wizard - Choose default installation path and click "Finish" - An icon named Reminder will appear on your desktop - It is important to know that the Reminder icon can be removed if you wish. TinyReminder (formerly Remainder) Notes: - You do not need to install the Reminder application - Once the application is removed, all the data (reminders, notes and preferences) will be deleted - You can create as many reminders as you wish to and manage them all easily - Updates are automatically applied - The program will now run automatically every time you turn on your computer TinyReminder (formerly Remainder) Requirements: - Windows - Java 7 or higher (Java 6 is not supported)
