amount of contacts and other things that I have to transfer every day (phones, address book, etc.) to my computer, my way of managing all of these items is every day to transfer all the stuff to my iPhone and do an automatic backup to Dropbox." - Alan Shore "This one may be a little over-priced, but it's also my first big software purchase, and I'm a little bit worried to become a regular buyer. Maybe I'll come to realise I don't need it... But at the moment it is a big money saver for me! " - Marco Basalo "If

---

you're using a Windows Phone 7 device or Windows 8 and you want to sync your contacts, then this is your app!" - Chris Nott "Seems like everything is already described very well on the about page but I especially like the unlimited storage (great for keeping backups). Thank you for creating this! " - Mathieu Yovitch "When it's the first time you buy something, you compare the cost with other products, you decide if you really need it or not, you understand a bit more what you are paying for. This is normal. But

---

the moment you re-buy something, you take out of your pocket the very definition of your money and you lose this comparison. The same way you can think about an app you already have installed on your phone. It's very likely that, if you decide to buy another software, this one is simply not very useful for you and you can simply forget to buy it. I bought Sonar since a while ago, an app I really needed. And now I can really recommend this software to other people. It's useful and allows you to make something

---

that you need. " - Antoine Ducros  
"My wife received a friend of hers's postcard, and since she'd never heard the voice of that postcard before, she had to listen. At first, I could listen myself too since I

**System Requirements For Phone Manager:**

**OS: OS X 10.5 (aka Panther) or 10.6 (or later) Disk space: 200 MB to install. It is possible to run Virtualbox in a 32-bit operating system using the 64-bit version of the Virtualbox VM. This should result in smaller memory consumption, slower I/O and slower graphics. It's not recommended to do this. See the Virtualbox manual on 32-bit vs 64-bit. Prerequisites: Install OpenGL, which is part of the Mac OS X 10.**
