You have to find a way to stop the evil Paploo and his absurd army of monsters, that are stealing all the energy from the planets. On your way, you can explore to find hidden powerup that will help you overcome the enemies. All the enemies are cute, and you will love their reactions and animations. You will also find hidden stuff on your way, and sometimes there will be a character telling you about an event on the planet. Story: It's the normal story mode, it will take you to 7 planets and the main goal is to get to the end. You will have two different classes and you will have to collect as much crystals as you can to find some upgrades. Survival: In Survival mode, you can travel through all the planets in the game over 7 days. You will have to survive to beat the monsters, and you will have to keep collecting crystals to upgrade your weapon. On top of that, you will find gems that will help you to powerup. You will also find new enemies during the survival time, and that's what makes the survival mode fun! Readme Came with Wii U and Nintendo 3DS versions of this game. Updated: Dec 27, 2018

The core mechanic of the game is combo points. There are three main ways to score combo points: Wall

Jump: As you jump off of ledges, you gain a Combo Point and your launch velocity increases. Clip Jump: By colliding with an enemy, you gain a combo point and your velocity is increased. Sparrow Jump: By collecting a pack of four gold-colored keys or a force or gold key while on the ground, you gain a combo point. Depending on how you jump, you have different launch velocities and different velocities (jump height). Game Description of the game: Combo Jumper is a simple and addicting platformer that keeps you guessing all the way through. Jumps are done by taking off in either the up or down direction, while a jump in the other direction resets your combo points. Collect gold keys to make it past the level, all while avoiding enemies and spikes! Game Description of the game (Story): The time is 1488. A comet has decimated planet earth and has caused the apocalypse. After a UFO deposits you, and you are given the choice of surviving on the planet or living in space. The game is much like The Day of The Triffids, but instead of playing as an outside person, you are the one who will control the fate of humanity. Classic Run 'n Gun is a frenetic, run-and-gun game for the PC. The gameplay consists of a 2.5D perspective, in which you need to kill both the enemies and scores that appear on the screen. In order to become the winner, you must strike a ratio of 180:1. Game Description of the game: Classic Run 'n Gun is a minimalist action game that will entertain the player with its over the top sense of violence. The game is based on dual control, so you must shoot with your mouse while controlling your movement with the keyboard. A classic, run and gun game with an 8 bit look and feel. The game is similar to classics like "Streets of Rage" and "Double Dragon". Features a platform action in a retro 8 bit style. You play as a bounty hunter on an unholy quest to clear his enemies' names from the court, across four floors of the most dangerous levels in town. You'll have to protect yourself from the murderous gangs that inhabit the most extravagant mansions, and

Game Beta: Week 1 Verdict For the most part it's been a fun experience. The developer QLOC tried to throw a ton of new features in this iteration, which makes it frustrating to get through the tutorial to actually build stuff. Luckily, there are some seriously cool ideas here, and you have a lot of content to go through. Tutorials on how to make things in Voxel Tycoon Story Intro Sketches with the Intro Levels Old Gameplay Demo Still Runs The sequel pretty much sucks. xP It is only worth of a free-to-play game. Background is still ok. Skins cause more problems than they bring. xP Sounds to me are repeated again and again. xP Please, DON'T FUCKING DO THAT. xP Poor matching audio You can cut the youtube-videos you find here, but the locations change so it's impossible to find a copy in another server. xD Interesting idea: Tilesets Verdict of Beta Week - 7.5/10 Introduction Welcome, my friends! After the overwhelming amount of feedback and support I got from my last blog-post, the devteam decided to finally let me review the game. As a matter of fact, they asked the most important thing for this beta version - "what do you think?". I think it would be great if you could like the blog-post and share it with your friends to get support. I am thankful, really! I was on vacation

last week, unfortunately I couldn't do more reviews for the server, as a matter of fact I was too busy going through it. Since it's a beta-version, I will be pretty rigorous in the reviews this week, and I will test 3 servers for the next few weeks. As a summary I would do as following: Review, overview of new features, review of popular servers and design-ideas. Because I already played the multiplayer for more then 60 hours, I will keep it aside in this review. Review Starting off, I recommend you to go through the tutorial to get a real grasp of Voxel Tycoon. I personally am stuck in the poor structure of its menu-system, as you can see in the GIF. One of the most annoying things is you must be skill-level 6
