Leland, a young man who possessed great dexterity, ascended to the heavens and become an elf. However, the power of his body grew so much that he lost all of his sense of hearing and touch. He sought after a way to recover the power that he lost, but was not allowed to do so. Leland's friend, Zael, was also separated from the world of men. Like Leland, he had lost his senses. To raise the power he possessed, he abducted a beautiful fairy, Milieu. Tarnished by the actions and blood that were in the true hearts of those evil people, Milieu grew to be a cursed creature. When Leland and Zael awoke in a new world, they were led by a man named Grath whose face was extremely hard. Staring at the beauty of Milieu, Grath said, "This is the true world; in this world, the two of you have been reincarnated into the world of men." Leland and Zael discussed what had happened, but Grath said they would not be allowed to speak of it. The two of them performed duties for the new world's government, but Leland's ambition to return to his elf life grew ever stronger. While at the stables, Leland heard the voice of Milieu's sister, Milen. Leland went to Milen, saying, "Milen, your sister has been reincarnated in the world of men as Leland! I don't know the details of the procedure, but please help me find her." Zael assisted Leland in this quest. Milen rejected Leland, saying, "You, a human, are not allowed in our own world. It is a horror that you have come here." Leland and Zael said, "We wish to avenge Milen," and walked out of the stables. Leland thought that Zael was an elf and asked why they were in this new world. Zael explained that the two of them were reincarnated, but the language they were speaking was wrong. Leland said, "We need to speak Elfish." Leland rode on Zael's back, and the two of them began to speak Elfish. They cleared their conscience of their past sins, and Leland decided to return to his old life.

Elden Ring is a new fantasy action role-playing game (RPG) in the development stage and is expected to be released under a new publisher in 2019. The version that I tested for this preview is a closed beta-test version. It looks like a fantasy RPG, but has been created with touch-screen interface capabilities in mind. The design is more in line with the top-down view seen in modern role-playing games (RPGs). Players will be able to move around in the game world using left and right thumb to move and tap the screen to take actions. The statistics seem to follow the rock-paper-scissors principle. The Elden Ring game features a large, open world to explore and has characters that vary in appearance and background. The game will feature a character creation screen where players can choose the gender, eye, hair, skin, and body fat of their character. When you begin the game, you'll be presented with an introduction screen that shows the main characters, such as the protagonist and a villain. The system will be able to tell which limbs were used to shoot an attack. Throughout the game, a variety of characters will cross your path. You'll get to know and meet them over time. You'll be able to meet old friends and rivals, and rivalries will be inevitable. The characters that you meet have their own stories and personalities, and you'll be able to save them if you choose to do so. Many areas that players will explore in Elden Ring are labyrinth-like environments where a variety of situations can come up. If you're in a pinch, you can use the back button to get to a safe spot. Elden Ring supports local cooperative multiplayer. Two people will be able to play together, giving players more opportunities to see their character abilities and tactics in action. Play Style In Elden Ring, you'll use the touchscreen interface to go around the game world. The interface is identical to the one used in The Legend of Zelda: Breath of the Wild. However, the controls are a bit different from the Wii U edition of The Legend of Zelda: Breath of the Wild. To increase the game performance, users will be able to use more than one touch screen for a better experience. For example, you can make a gesture to jump on a giant boulder, then touch the display to jump higher

here it says locale, it was supposed to say en_US instead of en_us. I've already made a pull request for it and it's in review now. I'll either have it fixed up soon or hit the back button and unread it, then come back and read it.

Thank you.

e, 18 Jul 2015 18:00:11 GMT>Utilization of energy in animal cells depends on the catabolism of molecules such as carbohydrates and lipids. These molecules are processed via a common metabolic pathway, in which those molecules are first broken down into smaller, more readily energy-yielding molecules via the Krebs cycle. Ubiquitous to the cell and responsible for the generation of energy, heme is found in the catalytic units of several of the enzymes in the Krebs cycle. The milligram quantities of heme which are required for daily metabolic turnover is an environmental burden
