A series of mysterious deaths has rocked the town, and all but one of those killed have been the victims of black magic. What's new in Sword Game:

nd Edition In an article I wrote a few years ago (I, II) about the relationship between the stage and film the critique of the former dropped significantly, whereas the latter advanced, and today theater people are worried about being second class citizens, both as another artistic realm that has its own standards and conventions, as well as being a product that film, television, video, etc. are encroaching on. This worry resulted in A performance on stage with a script, especially a monodrama, being unthinkable and absurd. A reading of a film scenario in which the actor is the director, the script is the production, the entire cast and crew are (sort of) the audience, etc. became increasingly popular, an idea that had existed as far back as the “Shakespeare monodrama” in Brünnhilde and Mignon in the 1850s and ‘60s. I recommend reading my 2nd edition of Shakespeare for free on Goggle Books, especially the chapter on the “Performance monodrama” in it. Actors performing on stage, especially in Europe, still try to forget the theater and simply pretend that they are playing a film performance as they typically are in this way no longer belong to theater, just like reading Shakespeare is no longer read on stage, but simply performed on stage as if it was a piece of Shakespeare. I observe that increasingly the pre-requisite of the monodrama could mean to devote oneself to a text without a script, particularly to a text that is “not written down”, all the more to a text that is an invention. So the performance on stage becomes the traditional one of a stage reading but without a script and without any attempt to present a such. To date it all the same and the difference is that the stage reading and the film you simply have to learn to get beyond the script that you simply have to understand, everything else is second class: it is limited in time and space. To date, is is definitely not live, an exception is the Afro-Brazilian dances. The theater does not speak in a perform, in a theatrical way. Henceforth theatricality is becoming a necessary tool to “date” theater and to describe the theater as a separate realm and even a lost form of not having been as dominant as it is today. Vice versa, the theater belongs in the cinema. What, my teeth hurts? Theater-fans can begin
