Screen 1,721 Bridgeman Bye Bye, Market Iszo Motors No User data Bye Bye Furniture 107 More than a decade ago, peopleâ€™well, many peopleâ€™thought the battery, traction control, braking system, and safety belts of virtually any Honda would do in a crash. These days, the primary countermeasure is airbags. Discussion Forum Hey Guys, I really need to update my dashboard on my Classic to VIN BL, I have the all the information but not sure what to get to crack this. It is a 270 in. (5850 model) I would use the U.S. State map with U.S. counties. I am interested in getting a DA330/Z1 Pro. However, I don't know how to get the right colors. I know my company wants black with white lines. Could I get a gray dashboard? I'm planning to run the dashboard with G6. Can someone tell me how to make the dash in VINSOLVE look like Z1 Dashboard Studio? I guess I need to make the 1st screenshot? I'm trying to get it as close as I can. Thanks for your help! Can someone look at the

following images? What exactly is the difference between these pictures? They are all JPG. Thank you! You cannot post new topics in this forumYou cannot reply to topics in this forumYou cannot edit your posts in this forumYou cannot delete your posts in this forumYou cannot post attachments in this forumQ: Python: Read all lines from a file, and do something with each line I have a file called my_file.txt, that is structured like this # 0: 1: 2: 3: 4 1 2 3 4 5 6 7 8 I need to parse this file to obtain each line, and run a function on each one of the elements. So my function will take the number 0-4 and do whatever operation is defined on those. I am not sure how to do that. I have been looking into the with open(), but I cannot seem to find a way of getting each line from the file using with open() (this was my first though). Any ideas, or directions? A: with open('my_file.txt', '
