I thought it would be pretty convenient for on the go! I was initially excited to give it a try but once I used it, I wasn't so sure about it. I didn't know how I would feel about the packable aspect but it still needed to hold what I wanted to carry on the go. For me, I really didn't like how it came together and how I looked. It wasn't flattering and I didn't like the way the straps pulled. Even with the jacket layer, I still felt like it was a little too bulky for working out. I thought if I could have figured out how to make the pieces work together better, I think this would be a good outfit for mom/mama bloggers to use to go for a walk, run, grocery shop or even day spa. I would not recommend

### **What's new:**

**Partisans 1941 Pack is the first content pack releasing for Path of Exile. It features an array of new items and a rework and overhaul of many existing items, totalling a 40% item level increase. Will the new pack result in an influx of players, or will players join the fractal? There is no way to tell for sure, but at the rate the Path of Exile community is growing, we think there's a great opportunity to gain new players for the pool of users in Path of Exile. Build: There is a huge variety in the items in the Partisans pack; for example, here are just a couple that provide immunity to bleed: Fire-Leaf Necklace You gain health when you bleed. Ironclad You gain fire resistance and immunity to bleed. Here's an example for a versatile choice: (Click images to enlarge.) Bladeling Cape You gain bleed damage and your bleed skill grants you the ability to bleed for bleed damage. Vengeance You gain bleed damage. Here's a veritable buffet of new items: Heritage You gain fire resistance and projectile weapon damage. Removal of i1 Through this find,**

our base i1 gem is destroyed. This means we currently have a higher chance to get i1d4 than i3, due to the higher chance for i3 now. You can still use gems, but they will not affect your base i1. Increased area of effect This gem gives us a higher chance of getting area of effects. This influences more than our most powerful abilities, such as Rune of the Feast. Increased abilities per level This gem will make us good at stacking abilities; for example, we used to primarily use +2 to +4 abilities, which are no longer easily possible with this gem. However, consider the fact that rune, essence, and other abilities cost less mob damage than ever before. Decreased 'tick rate' If you recall, a tick rate was the speed that a 0 level ability would tick at. For example, a tick rate of 4 means that an ability's tick effects occur at 5% less than its normal tick. In the new patch, the amount the tick rate decreases is 100. In other words, the item will still do the same tick amount, but it will occur as much more often. Typically, the item becomes more viable with this. Just look at some gem
