With the game's match engine at its heart, the updated player model is the first for a FIFA series title to incorporate physics-based deformation in player movement. Deformation is also key to the new player animation, with animations now reacting to the position and displacement of the player body. This includes reaction to changes in velocity and acceleration, and physical contact with opponents. FIFA 22 also introduces a new way to interact with the ball, as a new feature dubbed "Ball Impact," allows players to anticipate the future trajectory of the ball as it flies through the air and make quick decisions about where to position themselves before the ball arrives. "Together, the ball impact and ball speed technologies will help make play and gameplay in FIFA 22 feel much more realistic, which should help create a more authentic FIFA experience," said Henry Morris, senior producer for FIFA on PlayStation 4, Xbox One and PC. For more information on FIFA 22, check out our hands-on impressions below, and stay tuned for more updates on the title, including a new trailer, when it launches on PlayStation 4, Xbox One and PC. FIFA 22: Career Mode Throughout the development process, one key task was to implement new gameplay concepts into FIFA while simultaneously taking into account all aspects of the game's existing systems and features. While capturing and replicating real-world game play is the end goal, it was also important to create a simulation-based experience that is challenging and complex, yet rewarding. A key component of this is the FIFA Career Mode. We have heard your feedback over the years about Career Mode's inflexibility and difficulty, so we're making a number of improvements to the experience. FIFA 22 introduces a new set of gameplay mechanics, including the ability to play previously experienced gameplay through the inclusion of "replays." Also, for the first time in FIFA, you will be able to complete your Career path by earning every trophy – without having to worry about the End of Season penalties. Additionally, FIFA Career Mode features a new Take Control feature – the "Retro" option, which allows you to play through a match with the same tactics, formation and playing style of the manager for all fixtures in career mode. Replays and Stats We have been using replays in the development of FIFA for a while, but never at this scale. FIFA 22 introduces "Replays" to the Career Mode experience

Features Key:

- Player Impact - Your powerful attacks and controlled dribbles enable players to have unique, complex interactions with the game's AI teammates. Utilize a new Position Impact feature to predict the moments when your player is most vulnerable to opponent counters, deftly smother your opponent for a clean pass, or drop deep in order to help a teammate create a scoring chance. Review your passes by the AI to see when they are going to be ineffective or when to intercept with an under-read pass to open up an angle on goal. Use your powerful dribbles in strategy-laden and contested free kicks, to open up space in the box or to sneak through the back line on a short punt. Manage the threat to your defense by choosing the right support option for the match situation.
- Mighty Men – Take advantage of the world-renowned defining characteristics of the top 22 players in the world and lead your club to become the best. Create your perfect team by combining the skills, position, and ratings of dozens of real players and items from over 800 authentic kits, wearable clothing, and equipment.
- Flexible Player Traits – Each player in FIFA 22 has their own class-unique movement and on-ball performance traits that complement their role on the pitch and improve how they perform in the game. Ranging from smart shot selecting and tackling to explosiveness, pace, and heading, every trait has its own ratings and attributes, and when combined with their roles they work perfectly to complement your style of play. At the heart of your game-changing traits is Jumping, a quick and powerful player skill that provides increasing momentum gains for you and your teammates, and gives you and your teammates hard-to-beat height boosts in the air and acceleration boosts on the ground.
- Innovative Team Traits – Create new play styles by unlocking a collection of player and team-based traits for each class. Players can also complete Unique Player Challenges to gain new Trait Abilities.
- Intuitive Training – Real-world training will now find, coach, and select Training Modes that will best suit your playing style.
- All new Player Physics – Individually tweaked animation meshes, collision, and full kit integration are now used to create the authentic influence of physics around your player.
- Instantaneous Cross <Flight Ball Control - A wealth of new features lead into the next

What's new in Fifa 22:

- **Five New Cards** - Nicknamed 'The Finance Broker,' 'The Assister,' 'The Key Taker,' 'The Silver Imposter' and 'The Wingster,' five new cards which open up new ways to play and strategies in FIFA Ultimate Team have now been released.
- **New Picks method** - Pro Club coaches can now pick their players in Ultimate Team by either spending more points and picking players from the New Plays card pack or by selecting from the New Picks cards which will be unlocked by completing matches and winning and losing animations.
- **Sniper Mode** - Play a new game type called Sniper Mode. The aim in Sniper Mode is to clear an entire match of players within the first ten minutes, requiring you to aim and anticipate your opponents movements.
- **New Soccer Ball** - A new retro ball has been released, with improved ball physics and handling in FIFA 22.

FIFA 22 introduces 'Defending Underload', a new defensive strategy mode in which players can't score a goal on their own, but can score a goal on easy chances, putting pressure on their opponents to score. In other modes, defenders can now be assigned specific roles to make them more effective, such as defending in an unfamiliar area or playing an advanced short pass.

Upcoming content:

- You can access the new Player Tackling Type cards later this month.
- You can also download the brand new 'Be A Pro' Trailer at the top of the article.
- FIFA Ultimate Team features in this month's EA SPORTS Football Club update.

“Football is a beautiful game”. That’s how FIFA started, back in 1994, when the first soccer video game was launched on the Genesis. It was a revolutionary leap forward for sports gaming, offering players free movement and a full 360-degree perspective. Now, FIFA returns with a new game engine, game modes that reflect the real-world atmosphere, player, team and club authenticity, and FIFA Ultimate Team. Taken together, these elements breathe life into the sport, bringing the game closer to the real thing than it has ever been before. Features Powered by Football: EA SPORTS FIFA 22 brings the game even closer to the real thing than it has ever been before. Active Player Intelligence: Players make smart decisions to help you win the game, and the AI reacts intelligently to changing game states. Pick-and-Throw: Multiple players can throw the ball into the air, predicting where it is going to land, before backheelers can pass it back to their teammates. Interchangeable Injuries: Players can get injured and experience a realistic injury response that helps you adjust your tactics, adapt to the game situation and win more matches. On-field Tactics: Train your team tactically to a level of detail that matches real-world football. In addition, you can mark a man, use off-ball movement and possession, sign players, create new tactics and compete with your friends in the FIFA eCoach Manager. Match day gameplay: Experiences in-game that go beyond the solitary player. The tactical layers of the match unfold as you play: the crowds grow and change with the intensity of the match, and players get injured or tired, creating a pulse of game events that help you win your matches. Player Motion: Players move dynamically on the field, reacting to balls in the air, to the speed of a pass or to a dribble. Improved Player Running and Player Control: Players run more naturally and apply their pace to their movements, run with greater balance and more control in tackles and in holding the ball up in the air, and work intelligently to beat their opponent. New Movement-oriented Controls: You can look for a pass or run past a defender in style, with the new “sticky” controls. Improved Player Control: Players make quicker and harder-to-counter tackles and move more intelligently. Revised Player Controls: Key grips
