A validation study of the FIM+Spouse questionnaire for patients with stroke. The first section of the Functional Independence Measure Plus (FIM+) Spouse questionnaire assesses the overall functioning and independence of patients with stroke. However, there have been few studies to examine the psychometric properties of this section of the questionnaire. The purpose of the study was to examine the construct validity and reliability of the FIM+ Spouse section. A sample of 60 married spouses or significant others of patients with stroke participated in the study. Spouses and significant others completed the FIM+ Spouse section at baseline, 2 weeks later, and at a follow-up 2 months later. Analyses showed support for the construct validity of the FIM+ Spouse section, and Cronbach's alpha scores for the overall section and the three subscales ranged from 0.71 to 0.88. The results of the current study demonstrated that the FIM+ Spouse section was a reliable and valid measure of the overall functioning and independence of patients with stroke.

## What's New In?

Import directly from your paper sketches: Use AutoCAD's powerful new import to bring your paper sketches into your drawing or model. You can import directly from paper or from PDF files. Just open your paper or PDF file, select the import task, and then start. (video: 1:15 min.) View, edit, and annotate on live, 3D models. Annotations are applied directly to the model as you place them. Track and collaborate on a model, and work together seamlessly. (video: 3:15 min.) Press Enter for a single command to import a 2D drawing file or a 3D model. Rapidly and easily import 2D drawings or 3D models in the same way as 2D shapes. (video: 3:10 min.) Scoped Parametric AutoLists: Automatically build parameterized lists in AutoCAD that automatically adapt to object changes, without requiring additional editing. (video: 3:00 min.) Use a Scoped Parametric AutoList to indicate a single AutoLists that can adapt to changes in the objects you're working on. Add or remove objects to or from the list, and AutoCAD will adapt the AutoLists based on the objects. (video: 3:30 min.) Parametric outlines that automatically adapt to object changes. AutoLists automatically adapt to the objects you are working on to ensure that you always have the right amount of space in your drawing. (video: 2:40 min.) Edit AutoCAD files on your iPad. Use the AutoCAD app on your iPad to quickly edit AutoCAD files and bring them into the iPad screen. (video: 2:45 min.) Draw objects that can be edited in both 2D and 3D. (video: 2:30 min.) Increase your efficiency and accuracy with inline expressions. Inline expressions are grouped and attached to a drawing object. They provide a convenient way to change and edit properties of the drawing object when you draw. (video: 2:30 min.) Generate dynamic properties for 2D drawings. Define dynamic properties for a drawing, and when the value of the property changes, the property changes in real time. (video: 2:20 min.) Faster, more efficient linework with curves. Use the new curve function for more efficient and accurate linework. (video: 3:05 min.)
